Electricity Bill Management System

Introduction:

This project is an Electricity Bill Management System. It is used to manage customer records, track electricity usage, generate bills, and record payments.

1. Login Screen

- This screen is used for user or admin to enter username and password to access the system.

Electricity Bill System - Login

Electricity Bill System

Role: Admin ▾

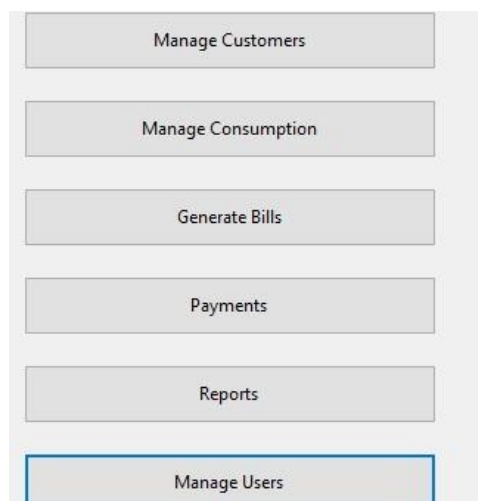

Username:

Password:

Login

Figure 1: Login Screen

- If admin would login following screens would appear

Manage Customers

Manage Consumption

Generate Bills

Payments

Reports

Manage Users

Figure 2: Admin Dashboard

Customer Management Screen

- This screen is used to add, view, update, and delete customer information.

Add

Figure 3: Customer Management Screen

Consumption Management Screen

- This screen is used to record and manage electricity usage of customers.

Customer:
 Units:
 Date:

consumption_id	Customer	units	record_date

Figure 4: Consumption Management Screen

Bill Generation Screen

- This screen is used to generate bills based on electricity consumption and view past bills.

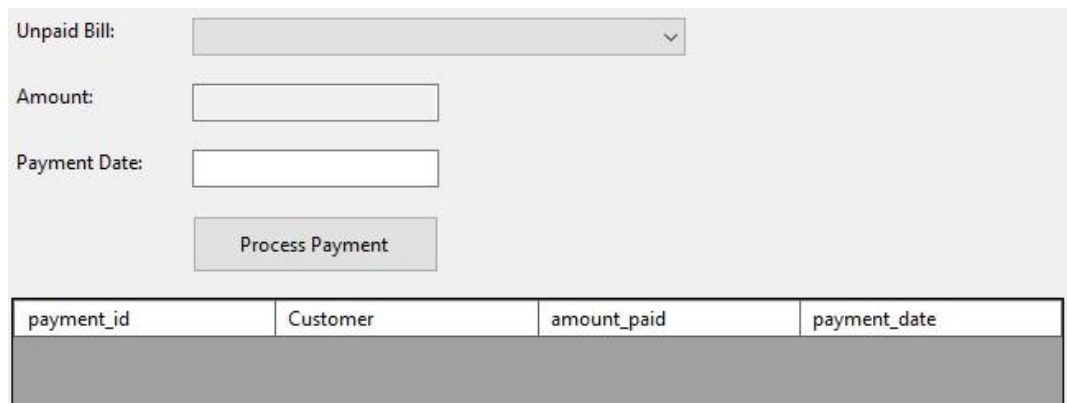

Customer:
 Total Units:
 Amount (Rs):

bill_id	Customer	total_units	amount	bill_date	status

Figure 5: Bill Generation Screen

Payment Processing Screen

- This screen is used to record payments and check payment history of customers.

The Payment Processing Screen features a form with the following elements:

- Unpaid Bill:** A dropdown menu.
- Amount:** A text input field.
- Payment Date:** A text input field.
- Process Payment:** A button.

Below the form is a table with the following columns:

payment_id	Customer	amount_paid	payment_date

Figure 6: Payment Processing Screen

Reports Screen

- This screen is used to view reports like billing details, payments, and unpaid bills.

The Reports Screen displays three buttons at the top: **Customer Bills**, **Payments**, and **Unpaid Bills**. Below these buttons is a large, empty rectangular area, likely intended for displaying report data.

Figure 7: Reports Screen

User Screen's:

User Management Screen

- This screen adds a user in the system and defines his/her role either he/she is admin or user.

The User Management Screen includes a table and a form:

user_id	username	role

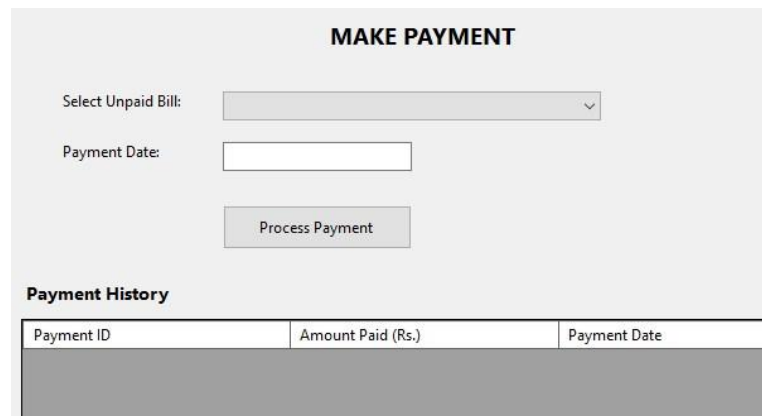

Form fields on the right:

- Username:** Text input field.
- Password:** Text input field.
- Role:** Dropdown menu.
- Add:** Button.
- Update:** Button.
- Delete:** Button.

Figure 8: User Management Screen

Make Payment Screen

- This screen allows user to pay his/her bill and can also view history.

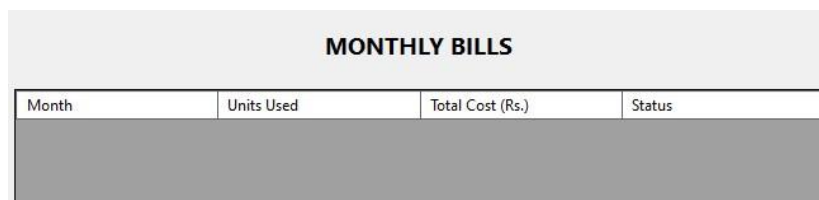

The screenshot shows a web interface titled "MAKE PAYMENT". It features a form with two input fields: "Select Unpaid Bill:" with a dropdown arrow and "Payment Date:" with a text box. Below these is a "Process Payment" button. At the bottom, there is a section titled "Payment History" containing a table with three columns: "Payment ID", "Amount Paid (Rs.)", and "Payment Date". The table body is currently empty.

Figure 9: Make Payment Screen

Billing Screen

- This allows user to check units they have consumed monthly and what cost they have to pay and check their status is their bill paid or not.

The screenshot shows a web interface titled "MONTHLY BILLS". It contains a table with four columns: "Month", "Units Used", "Total Cost (Rs.)", and "Status". The table body is currently empty.
